TONIGHT'S AWARDS

Awarded at the final level of judging and includes the following designations:

Special Citation – Awarded for superior elements of an outstanding lighting design, or in some instances, the use of lighting as an art form.

Award of Excellence – Awarded for an exceptional contribution to the art and science of lighting design.

Award of Distinction – Awarded for extraordinary achievement in lighting design.

The IES Illumination Awards are comprised of four parallel program categories:

Illumination Award for Interior Lighting Design, sponsored by Edwin F. Guth

In 1902 Edwin F. Guth founded the St. Louis Brass Company and later renamed it the Edwin F. Guth Company. Mr. Guth's profound creativity, entrepreneurialism and focus to improve interior lighting are partially represented through 147 patents awarded to him prior to his passing in 1962. This award recognizes exceptional interior lighting projects that balance the functional illumination of space with the artistic application of light to enhance the occupant's experience.

Illumination Award for Energy and Environmental Lighting Design

The Energy and Environmental Design Award recognizes quality lighting installations in commercial and industrial buildings that incorporate advanced energy-saving strategies and environmentally responsible solutions into the overall design.

Illumination Award for Lighting Control Innovation, sponsored by the Lighting Controls Association

Advanced lighting control solutions can provide significant energy savings, flexibility and other benefits in buildings. This prestigious award recognizes good lighting projects that exemplify the effective use of lighting controls in nonresidential applications.

Illumination Award for Outdoor Lighting Design, sponsored by Eaton

The Outdoor Lighting Design Award recognizes excellence in lighting design and application in all aspects of exterior lighting. The program celebrates achievements in aesthetics, applied technical acumen, creative solutions to demanding site conditions and advancements to the industry in outdoor lighting applications. The goal of the program is to further the understanding, knowledge and function of outdoor lighting as a critical aspect of the built environment.

All projects receive levels of recognition attained by consensus judge scores.

THE AWARDS

The IES Illumination Awards program recognizes individuals for professionalism, ingenuity and originality in lighting design based on the individual merit of each entry. Judges are selected from a broad professional spectrum representing knowledge of lighting and design excellence. The judging system is entirely based on how well the lighting design meets the program criteria. The Illumination Awards program is not a competition. 2018 marks the 45th anniversary of the IES lighting awards program.

Section Award

Awarded at the local section level to recognize commendable achievement in lighting design.

Award of Merit

Awarded to recognize meritorious contribution to lighting design. Projects receiving sufficient scores continue on to be judged at the final level.

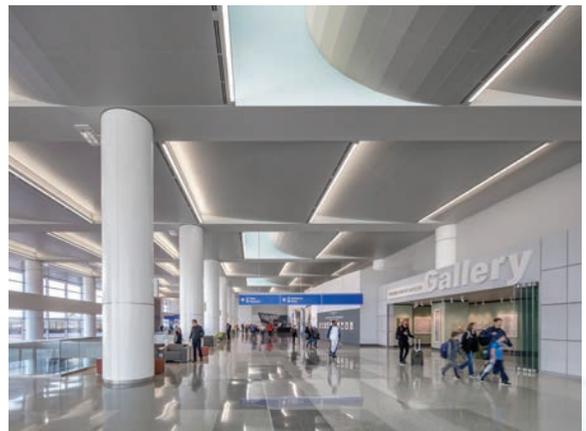

Phoenix Sky Harbor Airport Terminal 3 Renovation
